Abstract

Causes and Forms of University Violence From Students Perspectives

This Study aimed at identifying the causes and Forms of University Students Violence and its relationship with students academic level and gender (Male, Female).

The sample of the study consisted of (331) Male and Female Students from Petra University. Two Questionnaires were used, causes of University Violence and Forms of Violence.

The Study revealed the following findings:

- 1-The Level of Violence was at moderate degree.
- 2-There were significant differences in the causes of Violence between students of first academic level and both third and fourth levels.
- 3-The Psychological Violence was the most common form, followed by Physical, and Violence against properties.
